

# Hi! MY NAME IS FLIP-FLOP.

Since I was discovered living outdoors in Delta at just five weeks old, life's been a bit of a balancing act for me – literally! **I was born with a neurological condition called cerebellar hypoplasia, causing me to have poor control of my movement and balance.** I flip, flop, and wobble my way through the world, but don't worry, my mobility challenges don't stop me from living a fulfilling and playful life!

*Scan with your phone's camera to watch me in action!*

This great life wasn't always in the cards for me. During my initial vet exam after my rescue, **a veterinarian suggested euthanasia to spare me a life of suffering.** My foster mom took me home that day to observe me and assess my quality of life before facing an impossibly hard decision, and to make sure I knew what the warm love of a home felt like. And boy, was it amazing!

**I discovered the joy of chasing feather toys (because they won't let me at the resident bird, but I know I could take him!), snuggling up in pillow forts I create, and even befriending another foster kitten, Charlie,** who became my cuddle buddy and feline sparring partner (he never knows my next move – but then again, neither do I). I even got to make an appearance at Roice-Hurst's Wine and Whiskers Gala and became a bit of a celebrity for the evening! It has become clear that despite my unsteadiness, the only thing I suffer from is a shortage of tuna treats.

I'm now beginning the rest of my wobbly life with a doting adopter of my very own who loves me and all of my quirks and jerks, all because Roice-Hurst was able to take a chance on me.

**It's important to me that other medically-challenged pets receive that same chance at life, too – and that's why I need your help.**

**FLIP-FLOP AT THE GALA • FLIP-FLOP AND CHARLIE • CUDDLE BUDDIES**

Vet care is expensive – whether a pet has a neurological condition like me, broken bones, parvovirus, dental issues, kidney disease, or cancer. **These veterinary costs are covered for shelter pets by compassionate animal lovers within our community through a special fund at Roice-Hurst called Jake's Fund for Pets with Extraordinary Medical Needs.**

**Will you make a donation to Jake's Fund to ensure Roice-Hurst's most medically vulnerable dogs and cats like me receive the veterinary care they need?** Your gift will change the life of a sick or injured shelter pet.

Thank you so much for taking time to learn about my story and for giving pets like me a chance to thrive!

**Love,**

**FLIP-FLOP**
